

Stages of the Brain Blossom Program™

Blossom

Blossom Stage™:

Games that are targeted towards fast paced, complex, simultaneous body, brain and eye coordination coupled with greater cognitive challenges.

Flower

Flower Stage™:

Games that are targeted towards increased coordination of the eyes, mental imagery games, as well as increasing complexity in multi-sensory and simultaneous processing games.

Growth

Growth Stage™:

Games that are targeted towards gross motor, fine motor, cross body, core and eye coordination as well as spatial awareness integration.

Sprout

Sprout Stage™:

Games that are targeted towards developing and practicing skills from early life as well as integrating gross motor and fine motor function.

Seed

Seed Stage™:

Games that are targeted towards developing and practicing skills and movements common in early life.

Based on the individuals results of the initial evaluation they will be placed in one of five stages.

The Brain Blossom Program™ is an online, at home, brain and body exercise and educational program.
